

Power inserter / Power supply

TT-PS SAT 12V

The TT-PS SAT 12V power supply is specially designed for powering amplifiers and antenna preamplifiers.

The power supply can be used for **TELKOM-TELMOR** devices such as ASR and DIGIT antennas, PAR series preamplifiers and WM-10, WM-20, WM-30, WMS-20 and WK-410 mast amplifiers.

The device provides 12V voltage with a maximum current of 250mA and also allows power transfer, if it is required, for example, to cooperate with SAT signal with universal LNB.

A very practical element of the equipment of this power supply is the possibility of mounting it on a DIN rail, thanks to which it is easy to add the device to, for example, a cabinet equipped with such a rail.

TECHNICAL PARAMETERS

Type	TT-PS 12V SAT power inserter with power supply	
Bandwidth	MHz	47-2150
Attenuation	dB	1
Output supply voltage	V	12
Max. current consumption	mA	250
Power supply input	V _{AC}	230+/- 10%
Dimensions	mm	80x60x20

Technical parameters are subject to change without prior notice.
